FEBRUARY 1989

Residential, commercial and industrial sales decreased while electric generation sales increased in February 1989 compared with last year. Total utility sales were down from 1,398.0 trillion Btu in February 1988 to 1,364.6 trillion Btu in February 1989. Transportation volumes to end users were up 12.0 percent compared with last year.

GAS UTILITY VOLUMES TO ULTIMATE CONSUMERS (Trillions of Btu)

	February			Heating Season (Nov-Feb)		January 1 to December 31		
	1989	1988	%Change[1]	1989	(% Change) Last Period	1989 Forecast[2]	1988p	% Change
Residential	736.3	739.2	- 0.4	2,595.2	- 1.0	4,476.6	4,687.9	- 4.5
Commercial	327.0	342.0	- 4.4	1,159.8	- 3.1	2,209.1	2,294.4	- 3.7
Industrial*	203.6	234.1	- 13.0	827.4	- 14.3	2,239.6	2,343.8	- 4.4

Editor - Vanessa Chu (703/841-8503)

[1]Gas volumes are based on, and the percent change is a function of, the 69 sample companies whose sales constitute about 58% of total gas utility sales to ultimate consumers. The peak year in total sales for the gas utility industry occurred in 1972.
[2]1988 forecasts for the residential and commercial sectors are based on available 1988 monthly data with the remaining months derived by using a four year average. The industrial sector forecast (industrial only, electric generation, and transportation) is also based on available 1988 monthly data with the remaining months of 1988 heavily weighted by last years volumes with no adjustment made for degree days.
[3]Carriage volumes determined by using a simple straight expansion of sample data to represent the total gas utility industry. Carriage volumes for ultimate consumers are volumes owned by the ultimate consumer but delivered to another transporter, not the ultimate consumer, and are therefore broken out to eliminate double counting of volumes delivered to ultimate consumers.
P-Preliminary.
